

iVMS-4500 Software for iPhone

This software will only access DVR's with RES8.0 software build 8.4.6.23 or later. Download the iVMS-4500 file to your iPhone mobile device.

1. **Download iVMS-4500 by Hikvision from the Apple Store to your handset**
2. **Open the app and create a username and password**
3. Select devices and click the 'Add' option
4. Input the following connection information.
 - **Device Name** **Demo**
 - **Register Mode** **IP**
 - **Address** **108.15.64.2**
 - **Port** **8002**
 - **User name** **demo**
 - **Password** **demo**
 - **Chan No.** **4**
5. Then Save and OK
6. Tap on Live Preview Icon
7. Tap on '+' sign for one of the cameras
8. Tap on demo and the four cameras will drop down
9. Tap Camera 1 and then OK
10. After "Initializing" and "video Buffering" the video will load
11. Tap on second camera and repeat process.

Key Points:

- See the Help menu for features such as picture and video capturing, full screen functions, etc
- The software will not support PTZ control
- By modifying the user and password you can deny access to certain cameras
- Odd/odd can view only channels 1 and 3
- Even/even can view only channels 2 and 4
